Q1 Please enter your name.

Joshua Levenson

Q2 What is the most important affordable housing issue in your community?

Rental housing	Top priority but not the most important
Affordable homeownership	Important but lower priority
Senior housing	Top priority but not the most important
Critical repairs	Top priority but not the most important
Mobile homes	Top priority but not the most important
Permanent housing for homeless	Top priority but not the most important

Q3 Should local government provide more money, level funding, or less money to support affordable housing in your community? If you said level or less, why? If you said more, how much more AND how do you plan to achieve this?

Much more , **money**

Please provide an explanation for your response.:

At least roughly 2 million additional dollars should go into insuring that we build quality sustainable affordable housing that can go into a long term publicly owned solution to support new teachers and service workers to live in the community while they save for purchasing a home. Community members who have been displaced or are struggling with homelessness should also be supported with 10 dollar a night tiny sustainable units.

Q4 Utilizing surplus government-owned land is an important tool for creating affordable housing. What are some parcels of public land you think should be made available for affordable housing? Are there any parcels that should not be?

A portion of the green tract American legion and chapel hill transit properties should be planned for public housing.

2019 Candidate Survey on Affordable Housing

Q5 What is one local example of an affordable housing program or development that you think worked well? Please explain why you think that was successful and how you will support more of these successes in the future.

I do not think we have considered environmental impacts in our previous affordable housing projects and I think public funds going towards increasing duke energies poisoning GHG emissions is short sighted.

Q6 How would you ensure that people who have been affected by the lack of affordable housing have a "seat" at decision-making tables about the future development of affordable housing in our community?

More open space forums and public housing projects led by those who will be living in the homes.
